Sinks available under the trademark **lavanto<sup>®</sup>** sink are manufactured from high-quality solid surface material.

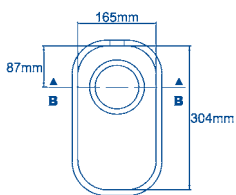

Several model ranges can be ideally combined with a kitchen waste disposal basin.

Every sink is produced on commission, therefore you can choose from a vast range of colours. In addition, details such as the location of the overflow drain outlet can be individually selected. Due to groove-free fabrication and slightly rounded inside corners, the sinks can be cleaned quickly and easily. Some colours cannot be thermoformed as successfully as others. If you would like a colour or material for your sink not listed in this brochure, please contact your sales representative.
