The round bowls of the **lavanto®bowl** series are made from high-quality solid surface material. They are suitable for any application and any modern washstand. The bowls can be used in hospital, hotel and private bathrooms and are, apart from few exceptions, available in most colours. As each bowl is produced on commission, detailed individual adaptations can be incorporated upon request.

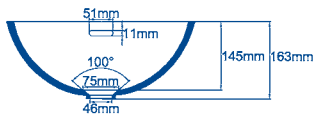

A perfectly fitted and 3D formed bowl screen from solid surface material is available to cover the visible part of the Rotondo bowl.
