Front skirt

The trapezoid, curved Vivo, Vero and Delta washbowls are undermount bowls made of solid surface material. Their modern shapes make them fit perfectly into every washstand. Due to gap-free fabrication and slightly rounded inside corners, the sinks can be cleaned quickly and easily. Thanks to the order-related manufacture the colour can be individually chosen.

Perfectly fitted, 3D thermoformed bowl cladding made of solid surface material is available to cover the visible part of the Vero bowl.
